question: "what's up with the database when it just kind of goes down"

```
search_corpus("what's up with the database when it just kind of goes down")
```

```
-> top: On-call Runbook: Database Outage v2 (score 0.176)
```

```
search_corpus("what's with database when just kind goes down")
```

```
-> top: On-call Runbook: Database Outage v2 (score 0.176)
```

finish: If the primary database is unreachable, page the database on-call immediately. [1]
