

A query the corpus doesn't cover

query: "what is the weather in tokyo tomorrow"

#1	Paid Time Off Policy v1	0.000
#2	Deploy Process	0.000
#3	Incident Severity Levels	0.000
#4	Postmortem Template	0.000
#5	Service Level Objectives	0.000

Every score is low. Retrieval still returns its top-5 -- it never refuses on its own.
