

Batching

one forward pass, two prompts

```
attention_mask row 0: [1, 1, 1, 1, 1, 0]
```

```
attention_mask row 1: [1, 1, 1, 1, 1, 1]
```

```
greedy next for row 0 (real pos 4): " floor"
```

```
greedy next for row 1 (real pos 5): " street"
```

The mask tells attention which positions are real; pad positions are excluded.
