

Is the drop real? Statistical significance

	pass rate	95% Wilson CI	
small sample (n=20)	14/20 = 70%	[0.481, 0.855]	PASS
large sample (n=200)	140/200 = 70%	[0.633, 0.759]	FAIL

Same 70% pass rate, two sample sizes. PASS here means 'not a confirmed regression', not 'good'.
