

## The lighter workhorses

|                              | validation | repeat 'a large latte' x5 @ temp=0 |      |
|------------------------------|------------|------------------------------------|------|
| OrderItem (drink+size+ext... | 2/3 failed | -                                  | FAIL |
| SimpleOrder (drink+size, ... | 0/5 failed | 5/5 identical                      | PASS |

A 494M model is not reliable on every schema. Trim to the shape it actually hits, then trust temp=0.
