

DeepEval, for real

real library, real numbers

```
deepeval pass rate: 4/5 = 80%
```

```
Same numbers as the hand-rolled exact-match topic -- computed this  
time by deepeval's real, non-LLM ExactMatchMetric and assert_test.
```

`deepeval.metrics.ExactMatchMetric` is a genuine subclass of `deepeval.metrics.BaseMetric`.
