

From prose to objects

garbage in, exception out

```
model reply (prose, no JSON):  
  "Sure! One large oat milk  
  latte -- $6.25."  
  
parser: raised OutputParserException  
  
no Order object was produced.  
the boundary is enforced, not hoped for.
```

A malformed reply does not limp into the till as a half-order. It raises, loudly, at the boundary.
