

The conversation is a typed list

system

You are the barista at Beanline Coffee. Friendly, brief, always quote exact prices from the menu.

human

hi! what's good today?

model.invoke(list) -> AIMessage

reply = model.invoke(convo)

type(reply) -> AIMessage

reply.type -> "ai"

the WHOLE list crossed over;

the model saw both messages

The whole list crosses to the model in one call. The return value is a message, not a string.
