

Prompts are functions

system

You are the barista at Beanline Coffee. Serving Maya. Menu: drinks: latte \$4.75, cappuccino \$4.00, espresso \$3.00, mocha \$5.00, cold brew \$4.25. sizes: small +\$0.00, medium +\$0.50, large +\$1.00. extras: oat milk +\$0.75, extra shot +\$1.00, vanilla +\$0.50. food: croissant \$3.50, cookie \$2.75.

human

how much is a latte?

the contract

`prompt.input_variables`

`> ['input', 'menu', 'name']`

a template declares what it
needs; `invoke()` must supply it

the template is code,
the menu is data

Re-invoked: the model demonstrably sees \$4.75. The template never changed.
