

Stop, retry, escalate

make_shot node, attempt 1

```
add_node(  
    'make_shot', make_shot,  
    retry_policy=RetryPolicy(max_attempts=3, retry_on=MachineJam),  
)  
  
attempt 1: MachineJam('jam on attempt 1')  
langgraph catches it, matches the retry_policy, retries automatically.
```

The machine is a deterministic counter, not randomness: attempts 1 and 2 always jam.
