

The same answer, sooner

the ledger

```
streamed, then joined:
```

```
"One large oat-milk latte to go, that's $6.25 -- coming right up, Maya."
```

```
plain invoke, same script:
```

```
"One large oat-milk latte to go, that's $6.25 -- coming right up, Maya."
```

```
equal: True    chunks: 25    chunk + chunk really concatenates
```

Streaming changes WHEN you see the answer, not WHAT it says.
